Bed platform height	420~780mm
Trendelenburg/Reverse Trendelenburg	0-12°
Head and foot board length	630mm
Back section angle	0~75°
Foot section angle	0~40°
side rail height	500mm

Safety

Children's safety are the most priority for the pediatric bed. The unconscious control and incapability should be taken into consideration and these are complete different comparing with an adult bed.

YA-PD5-4 is adopting 360°surrounding protection for the patient, and the height from platform to edge of railing can reach 500mm to provide enough safety from falling down even standing on bed.

The gap between the railing is minimized to under 60mm to avoid entrapment of both heads and hands.

Double security railing locking mechanism located facing outside to deny the accessibility of children's mis-operation.

Main details

Attractive environment

Children are sensitive to the environment. To comfort the motion, YA-PD5-4 is designed with 360°visibility both from railing and the transparent head/foot board. Furthermore, the optional cartoon picture will also make the kids feeling relax.

Functionality

As a medical bed which can be used in private ward or even ICU, it is featured with multi-functions. Motorized with four actuators, it has back, knee, height, trendenleburg and reverse trendenleburg bed positions.

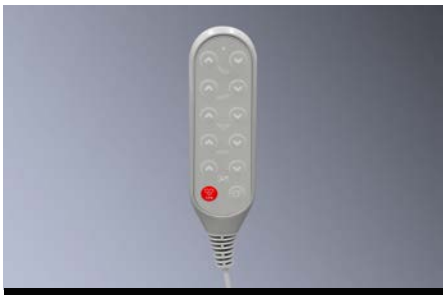

Easy bed-exit

The unique telescopic railing provides not only safety but also easy bed-exit. The railing can be dropping down into a lower position to enable the children to get of the bed instead of being carried over from caregiver.

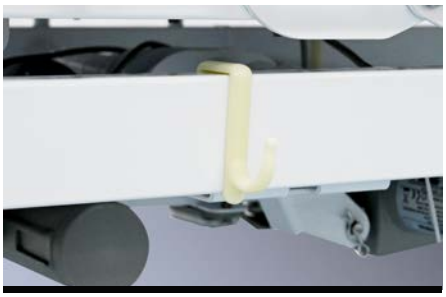

Mobility

YA-PD5-4 is equipped with central brake, so one step pedal operation can unlock the bed or lock the bed firmly.

Remote control

The remote control has a safety lock and clear symbol to prevent accidental touches.

Urine bag hook

Night light

Night light can provide soft lighting environment.

Height adjustable side rails

The guardrail has three-level adjustment function to meet different needs.
